

ELEPHANGO SCHOOL SOLUTIONS

EASY TO IMPLEMENT

Get your entire school or individual classroom up and running in no time. Simply register your school and our step-by-step process lets you take it from there. No complicated spreadsheets or large data uploads—we make it easy.

YOUR PATHWAY TO PERSONALIZED LEARNING

Elephango provides teachers with thousands of lessons that can be filtered by learning style, academic level, personality style, and more. Assign lessons to an entire classroom, differentiation groups, or individual students.

RESEARCH BASED

Our research alignment begins with our lesson format and continues to include project-based opportunities for critical-thinking, creative development, multi-model instruction, and the development of real-world skills.

CONNECT LEARNING TO LIFE

Every lesson takes learning back to life. Students understand the why behind what they are learning and are challenged to connect every lesson back to their own world.

MORE THAN DRILL AND PRACTICE

Elephango has thousands of lessons designed to foster deeper learning. We answer the question, “Why is this important?” and connect every lesson to life.

PROJECTS IDEAS GIVE STUDENTS CHOICE

Assign lessons with the confidence that your students will not only gain valuable learning experiences but also have the opportunity to choose from a variety of projects to showcase their learning.

EARN AND SHOWCASE BADGES

Explore geography with our *Globe Trekker* badge or become a *Math Mechanic* or *Model T Teen* by completing a series of lessons. Students can choose their badges and dig into topics that interest them.

ACHIEVEMENTS PAGE PROVIDES MOTIVATION

Students at any level can climb the leaderboard, display their learning badges, and earn trophies and awards. It's all based on engagement—a big plus for struggling learners.
